Collagen Dural Regeneration Matrix

A unique combination of excellent drapeability, leak resistance and balanced resorption makes RESODURA®*matrix onlay plus* the top choice in duraplasty. RESODURA®*matrix onlay plus* is a completely conformable and resorbable membrane matrix engineered from highly purified type I collagen. The top layer of the sponge is sealed with a thin layer of collagen film, rendering it leak resistant. It is indicated for use as an onlay (non-sutured) collagen membrane for the repair of the dura mater. RESODURA®*matrix onlay plus* facilitates healing with balanced in-vivo resorption of the implant and regeneration of host tissue.

Top Layer - Smooth Film

Bottom Layer - Porous

- Highly purified type I collagen
- Sponge with leak resistant top layer
- Onlay implantation
- Controlled resorption for effective dural repair
- Drapeable, yet repositionable
